SUMMARY

Baseball analytics professional with 4 seasons of experience supporting player development, scouting, and game-day operations in professional and collegiate baseball. Experienced in TrackMan pitch-level analysis, statistical modeling, Python, R, SQL, and data visualization. Developed original pitcher-evaluation research presented at SABR 54 and Saberseminar 2026, with experience translating advanced metrics into actionable recommendations for coaches and players.

BASEBALL EXPERIENCE

Ogden, UT
2022- 2026

Ogden Raptors - Director of Analytics

- Operate TrackMan, Synergy, and Diamond Connect to deliver pitch-level analytics and scouting support
- Build and distribute pre-series opponent reports and post-game performance feedback for coaches and players
- Perform data cleaning, transformation, and quality control to ensure accurate reporting
- Support scouting initiatives contributing to 4 player signings to the Raptors
- Communicate directly with athletes to translate advanced metrics into actionable adjustments

California Baptist Univ. - Assistant Baseball Statistician

Riverside, CA
2024

- Capture and analyze TrackMan data during practices and games to evaluate pitcher performance
- Educate pitchers on movement profiles, pitch design concepts, and metric-based development feedback
- Collaborate with coaching staff and analytics team to enhance player evaluation workflows

RESEARCH EXPERIENCE

Riverside, CA
2026

California Baptist University - Research Analyst on a Multi-Institutional Study

- Analyze large-scale wearable sensor datasets (EDA, HR, accelerometer) as part of a multi-institution research collaboration including Stanford University
- Clean and process raw AVRO-based time-series data using Python pipelines and feature engineering workflows
- Develop aggregated metrics and visual dashboards to evaluate participant physiological response patterns
- Collaborate with faculty and research teams on experimental design, data reliability, and reporting for publication

RESEARCH & PRESENTATIONS

Composite Dean’s Index (CDI): A Multi-Dimensional Framework for Pitcher Evaluation

- Developed a composite pitcher evaluation model integrating Stuff, Command, Miss Ability, and Contact Suppression using empirical-Bayesian stabilization and standardized metrics
- Validated performance against MLB pitching outcomes across the 2025 and 2026 seasons
- Presented at SABR 54 Annual Convention - Cleveland, OH | 2026
- Presented at Saberseminar: Sabermetrics, Scouting, and the Science of Baseball - Chicago, IL | 2026
- Manuscript in development for publication

EDUCATION

California Baptist University

Weber State University

B.S. Sports Analytics (Sport Performance Concentration)
Minor: Data Science
Certificate of Achievement: Excellence in Statistics Research

A.S. General Studies

TECHNICAL SKILLS

Programming

Python, R, SQL

Modeling & Statistics

Regression, Classification, Feature Engineering, Model Validation, Mixed Models, ANOVA, Machine Learning

Visualization

Tableau, Power BI, Excel, Shiny, ggplot2

Baseball Analytics

Pitch Modeling, Pitch Design, Movement Profiles, Pitch Classification

Baseball Technology

TrackMan, Synergy, BaseballCloud
